

The screenshot displays the Cisco Packet Tracer software interface. At the top, there is a menu bar with options: File, Edit, Options, View, Tools, Extensions, and Help. Below the menu bar is a toolbar with various icons for network configuration. The main workspace shows a network topology with a central switch connected to three PCs (PC1, PC2, PC3) and a server. The interface also includes a status bar at the bottom with a clock showing 10:00:00, a power cycle devices button, and a scenario dropdown menu.
